THIS IS A COMMON PIPISTRELLE BAT.  
IT IS SO SMALL, IT CAN FIT INTO A MATCHBOX.

GREEN SPACES CAN BE WONDERFUL PLACES  
FOR PEOPLE AND WILDLIFE, INCLUDING BATS.

FLOWERS AND GRASSES THAT SUPPORT INSECTS  
ARE GOOD FOR BATS, AS ALL SPECIES OF BRITISH  
BAT ONLY EAT INSECTS, INCLUDING MIDGES, MOTHS,  
MOSQUITOES AND BEETLES. EVEN A SMALL BIT OF GREEN  
SPACE MEANS YOU CAN DO YOUR BIT TO HELP BATS.

DESPITE ITS SIZE, IT CAN EASILY EAT 3,000 INSECTS A NIGHT: LOOK FOR IT FLITTING AROUND THE GARDEN AT DUSK OR A LIT LAMP POST.

THE PIPISTRELLE IS OUR MOST COMMON BAT. THEY FEED ON  
MIDGES, MOTHS AND OTHER FLYING INSECTS THEY FIND USING  
ECHO LOCATION. LIKE ALL UK BATS THEY COME OUT AT NIGHT  
AND SLEEP IN THE DAY. REMEMBER THEY NEED OUR HELP, GROW  
WILDFLOWERS THAT FEED INSECTS AND YOU SUPPORT BATS.
